

## Design UI and build backend functionality for calculator react JS web application from scratch.

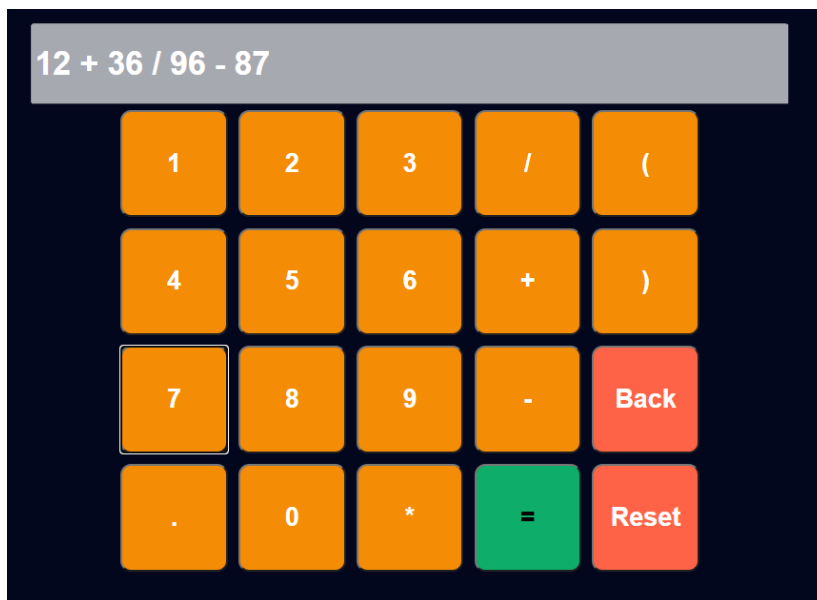

This Web Application contains three Calculators.

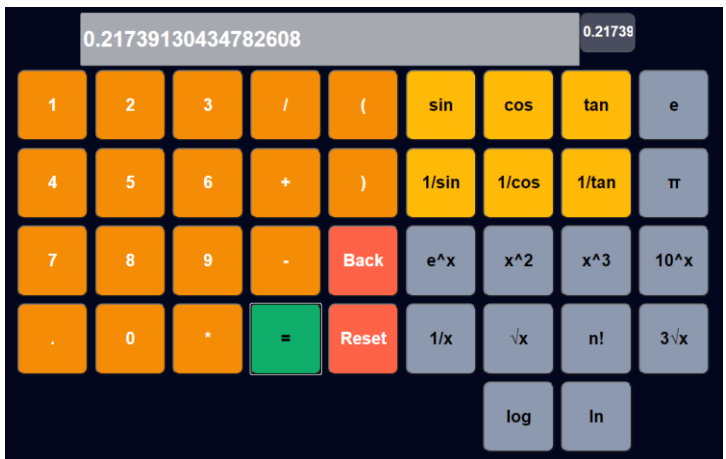

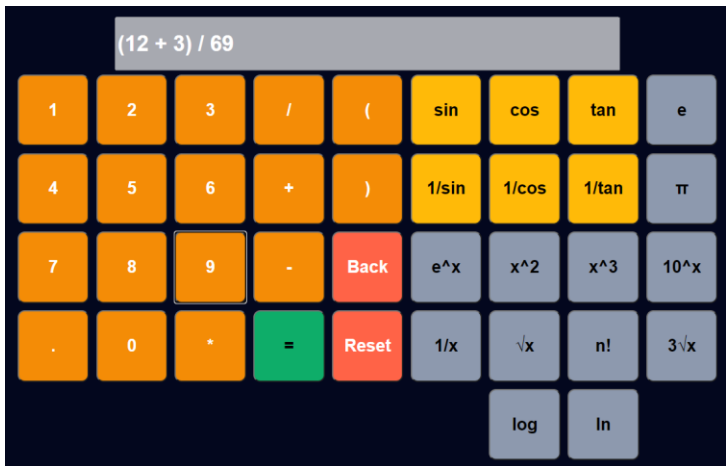

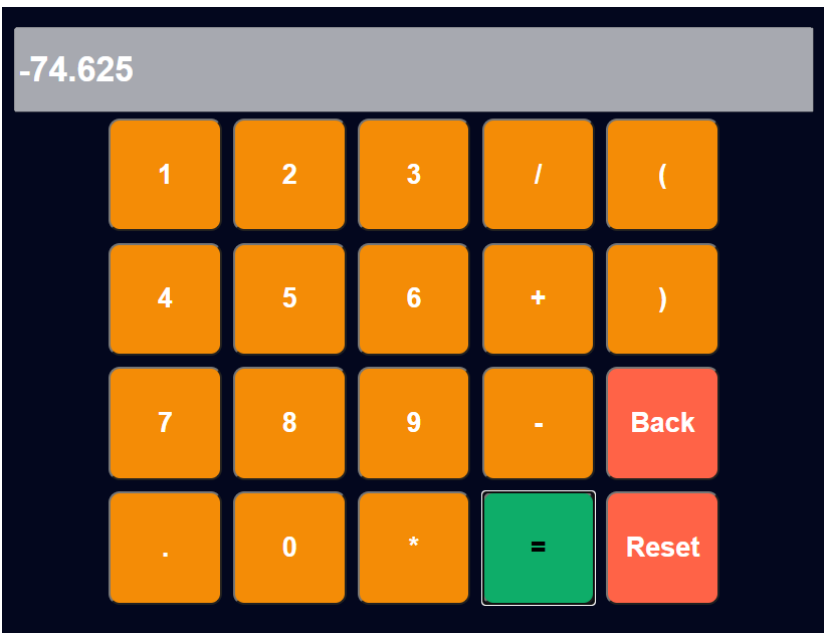

1. Standard Calculator.
2. Scientific Calculator.
3. Date Calculator.

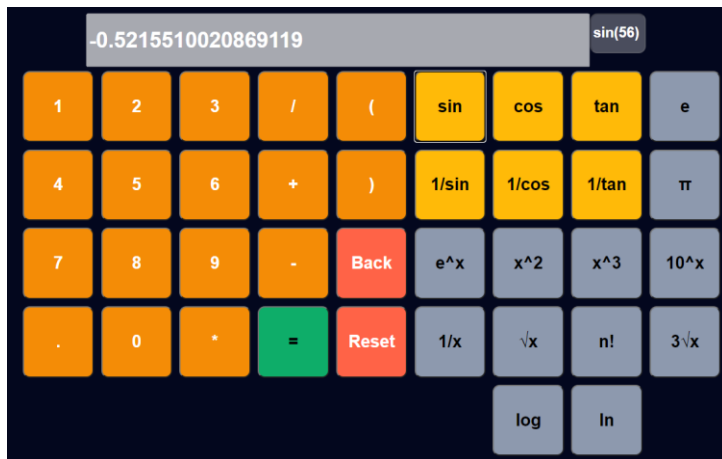

### Functions:

1. The Equation or the arithmetic entered is parse to function to obtain the result.
2. Trignometric and Log functions implemented using Math library.
3. Constants (e and PI) obtained from Math functions.
4. Date Picker component used for the Date calculator.
5. Keypad Component and Scientific Keypad components extracted from the Calculator.

### Output:

From Date

03/07/2021

To Date

04/03/2021

Answer

Seconds 2332800

Minutes 38880

Hours 648

Days 27

Months 0.88767123287671

Year 0.07396322130627775

## UI Design of Calculator
